## THE PASSING YEAR

From the grower's point of view this past year has brought its full quota of difficulties but despite them all we have seen a steady expansion in both the quality and quantity of stock available. We present this year a list which is, we believe, more complete than any that we have previously offered and we look forward to sending excellent material to all customers, both old and new.

### SORTING OUT THE HARDY AZALEAS.

This work continues. The method of presenting our Azalea stocks to you is changed this year to what we believe will be its permanent form. The different groups of Japanese Hybrid Azaleas are not shown separately but we have selected what we believe to be some of the best varieties in dwarf, medium and tall flowering plants over a wide range of colors. Each variety has a full description as to type, habit of growth, season of flowering, hardiness and color. We hope that this form of presenting our Azalea collection will enable you to select the special varieties you need.

The late fall frost of 1951 hit many of our Kurume varieties rather badly and we are determined not to be caught in this way again. Frames for the protection of all our Kurumes are now being constructed and we hope to store all these varieties through the winter from this year onwards.

### OWN ROOT RHODODENDRONS.

Many of you will know that we have been endeavoring to raise Rhododendrons on their own roots with a moderate amount of success. On pages 23 to 31 you will find a more complete list of varieties which we are offering for the first time on their own roots. If you have experienced unduly high losses from grafted plants in the past, then we are sure that plants on their own roots are what you need. It is the Rhododendron ponticum understock which is at fault, and we know, from some years experience now, that own root plants succeed where all others fail. Stock is in many instances severely limited but we are progressing and each year should see larger quantities and a wider range of varieties.

### B&B TAXUS.

As part of our rebuilding program we have been growing on blocks of the standard varieties and some of these are coming in for the first time this year. We have excellent stocks to offer.

### SALES AND SERVICE.

We do not operate this nursery only to sell plants. We are here to help in any way that we can. Write us freely if you think we can assist you in any way or ask our sales representative, John Polhemus, to call if you are within 500 miles of Bridgeton, N. J.

ACER PALMATUM ATROPURPUREUM NOVUM.   GRAFTS.

For the past six years we have propagated all our maples from one stock block only and these are the original novum which we know are true to name and color. Occasionally plants will fade in the intense summer heat. If this happens and you care to return the plants to us, we will gladly replace without charge. Stock is extremely limited.

COLOR:            Large, mature leaves. .. HCC-1030, Maroon.  
                  Young leaves. .... HCC-827, Ruby Red.

HARDINESS:	H-1 to H-2.	<u>Per 100</u>
Strong one year grafts, grown in open beds. ....		\$125.00
Two year, bed grown.

TWO YEAR GRAFTED JAPANESE MAPLES, PHOTOGRAPHED AUGUST 18th.

## J A P A N E S E   H Y B R I D   A Z A L E A S

In the following pages you will find our set of Azaleas offered in a different manner. The basis of this is a plan which is being worked upon by the New Jersey Nurserymen's Association to evaluate the hardy Azaleas of all groups and to record the best varieties in the main color groups as dwarf, medium compact, medium tall and tall and then again as early, mid season, and late flowering. There are of course more than enough varieties to fill every section of this group but we have recorded only a few of the tried and proven best. Eventually by careful selection we hope to fill the whole range with outstanding and reliably hardy Azaleas selected from all the main hybrid groups.

We hope the new system will be of assistance to the people who use our Azaleas. Your critical comments and suggestions will be much appreciated.

GABLE'S ROSEBUD. A DWARF EXTREMELY HARDY AZALEA OF GREAT BEAUTY. THIS IS A TYPICAL EXAMPLE OF WHAT WE MEAN BY "OUTSTANDING".

P A L E   P I N K

ETHELWYN. XX. H-2. GA. Sgl. E. Dwf.

COLOR....HCC-527/1 RHODAMINE PINK.

We have been forced to discard Coral Bells for lack of hardiness. It is quite unreliable and at the present time there is no adequate substitute in this group. Ethelwyn is the nearest, and is included because it is much more hardy.

	Per 100
Spring liners (May 1, 1953 delivery). . . . .	\$ 25.00
4-6" B&B 2 yr. Bed grown. . . . .	55.00
6-8" B&B 2 yr. Bed grown. . . . .	75.00

FEDORA. XXXX. H-1/. KA. Sgl. Mid S. T.

COLOR....HCC-625 PHLOX PINK.

Although Fedora has been on the market now for many years it has never been surpassed. Exceptionally large flowers, clear color and unusual hardiness combine to make this an outstanding landscape Azalea.

Spring liners (May 1, 1953 delivery). . . . .	20.00
9-12" B&B 2 yr. Bed grown. . . . .	80.00
12-15" B&B 3 yr. Bed grown. . . . .	150.00
15-18" B&B 3 yr. Bed grown. . . . .	225.00
18-21" B&B 4 yr. Bed grown. . . . .	325.00

ROSEBUD. XXXX. H-1/. GA. Dbl. L. Dwf.

COLOR....HCC-625/2 PHLOX PINK.

For hardiness, for daintiness and for sheer unadulterated beauty no Azalea we have yet seen can compare with Gable's Rosebud. This is not our opinion alone. Plants are now on test in many parts of the world and wherever the plant has flowered growers are enthusiastic. It is a true dwarf and grows slowly. The flowers develop over an extended period of two to three weeks and are particularly attractive in the early stage when they exactly resemble tightly furled miniature pink roses. When fully open they are a clear baby pink with a satin sheen texture. Rosebud is completely hardy. We are propagating as many as we can but order early to avoid disappointment.

Spring liners (May 1, 1953 delivery). . . . .	30.00
3-4" B&B 1 yr. Bed grown. . . . .	70.00

#117. XXX. H-2 to H-3. USDA. H in H. Mid S. Med T.

COLOR....HCC-625/2 PHLOX PINK.

Just to whet your appetite we are recording this variety because it is one we rate highly. Unfortunately we cannot offer plants this year. It is a medium tall grower with good sized hose in hose flowers of a clear pink. Once the flowers open the outer edge of the petals fade to almost pure white giving a most attractive two-toned effect. We hope to have liners available next year.

D E E P   P I N K

DOUBLE HINODEGIRI.   XXX.   H-4.   KU.   H in H.   E.   Dwf.

COLOR....HCC-623 NEYRON ROSE.

Our tests last year showed the value of this variety over Sun Star which has accordingly been discarded. We continue propagation in quantity because the color is quite distinct and should not be confused with the true Hinodegiri.

Per 100

Spring liners (May 1, 1953 delivery). . . . .	\$20.00
4-6" B&B 2 yr. Bed grown. . . . .	60.00
6-8" B&B 2 yr. Bed grown. . . . .	75.00

ISABEL.   XXXX.   H-3.   GA.   H in H.   Mid S.   Med T.

COLOR....HCC-23/2 ROSE MADDER.

We had hoped that this variety might replace Coral Bells, but under the new color arrangement it is not comparable. It is similar to Double Hinodegiri but more upright in form. A bright, fresh, and quite outstanding Azalea.

Spring liners (May 1, 1953 delivery). . . . .	30.00
---	-------

KATHLEEN.   XXXX.   H-2.   KA.   Mid S.   T.

COLOR....HCC-25/1 ROSE BENGAL.

This variety is in effect a deeper colored Fedora. It has the same large size bloom and vigorous upright habit. Stock extremely limited this year.

Spring liners (May 1, 1953 delivery). . . . .	35.00
---	-------

S A L M O N   P I N K

BRIDESMAID.   XXX.   H-4.   KU.   Sgl.   Mid S.   Dwf.

COLOR....HCC-621/1 CARMINE ROSE.

This is a standard variety with many growers. We do not have stock now, but hope to have liners available next year.

LOUISE GABLE.   XXXX.   H-1.   GA.   Semi-dbl.   L.   Med T.

COLOR....HCC-623/2 NEYRON ROSE.

Last year the unusual demand reduced stocks to danger point. We are not offering any this year but hope to do so next season.

POLAR.   XXX.   H-2.   KU.   H in H.   Mid S.   Med Com.

COLOR....HCC-021/1 CLARET ROSE.

This is one of a group raised by Mr. Overdevest for hardiness. We believe it will be an excellent variety. The color is good and the young liners develop rapidly. Moderate sized hose in hose flowers. Strictly limited stock.

Spring liners (May 1, 1953 delivery). . . . .	30.00
---	-------

SALMON BEAUTY. XXXX. H-3 to H-4. KU. H in H. E. Dwf.  
 COLOR....HCC-261/1 CARMINE ROSE.

One of the standard Kurumes, yet quite outstanding  
 in its color group. There seems little possibility  
 of this variety being superceded for some time.

	Per 100
Spring liners (May 1, 1953 delivery). ....	\$ 20.00
4-6" B&B 2 yr. Bed grown. ....	60.00

R O S E   R E D

AMOENA COCCINEA. XXXX. H-1/. KU. Sgl. E. Dwf.

COLOR....HCC-25/1 ROSE BENGAL.

Please do not confuse this plant with the bright purple Amoena. The color of Coccinea is a bright, yet pleasing rose red. It is completely hardy and some growers in Chicago have reported excellent results with it. Occasional branches may revert to type but if these are cut out the plant will keep true.

Spring liners (May 1, 1953 delivery). .... 20.00

HINODEGIRI. XXX. H-4. KU. Sgl. E. Dwf.

COLOR....HCC-23 ROSE MADDER.

This variety sells ten to one over all other Azaleas simply because it is the most well known. You must stock Hinodegiri but don't overlook the possibility of introducing your customers to some of the other varieties which are just as good if not better. We believe that this will eventually be superceded by Hino Crimson.

Spring liners (May 1, 1953 delivery). ....	17.50

#76G. XXX. H-1. GA. Sgl. Mid S. T.

COLOR....LAVENDER

We are commencing propagation in moderate quantities of this in place of Kaempferi Atlanta. It has a more attractive flower with frilled petals.

Spring liners (May 1, 1953 delivery). .... 25.00

P U R P L E

AMOENA. XX. H-1/. KU. E. Dwf.

COLOR....HCC-729/2 PEONY PURPLE.

We are recommencing propagation of this variety to fill out the color group and because it is completely hardy. It is, in fact, one of the most hardy varieties we grow.

Spring liners (May 1, 1953 delivery). .... 25.00

HERBERT. XXX. H-1/. GA. H in H. Mid S. Med T.

COLOR....HCC-30 CYCLAMEN PURPLE.

An excellent variety with large frilled flowers and a deep true color. Completely hardy, Mr. Gable's evaluation is "super-hardy".

Spring liners (May 1, 1953 delivery). .... 25.00

LILAC TIME. XXX. H-2. KA. Sgl. Mid S. T.

COLOR....HCC-629 RHODAMINE PURPLE.

An excellent vigorous grower which after further tests may prove to be as hardy as any of the Kaempferi. The flowers are a good size and have a luminous color with an orange shading in the center.

Per 100

Spring liners (May 1, 1953 delivery). .... \$ 25.00

M I S C E L L A N E O U S    A Z A L E A S

HARDY GHENT'S.

We have felt for some time that our range of Azaleas would not be complete without some of the hardy Ghent types. There is no yellow Azalea in any of the Japanese hybrids and then again, the hardiness and reliability of the Pontica hybrids is without question. We offer, therefore, for the first time this year, what we believe are some of the best varieties. We expect to extend this list in following years.

BOUQUET DE FLORE.

# COCCIDIOPTONS

OWN ROOT  
HYBRID RHODODENDRONS

As many of you will know, we have been working for four years to develop stocks of hybrid Rhododendrons on their own roots. The reason which prompted us to do this was the disease which attacks the *R. ponticum* understocks. We decided that every effort must be made to produce stock on its own roots, because plants grown this way are not susceptible to the disease and losses are negligible.

There is no difficulty with *Roseum Elegans* and *Catawbiense Grandiflorum* but other varieties present a challenge to us as propagators. For the first time we have moderate quantities in a number of varieties available only as one year liners. This one year liner grade should not be considered as material which can take its place in the B&B group. The plants are liners, and can only be used for growing on. But they can be grown on with every certainty of success.

We now propose to discontinue grafting. This may mean a temporary shortage on some varieties, particularly the red ones, but we are determined to supply stock in which we have complete confidence. We believe the only answer to be plants on their own roots.

We have stock plantings of new and hardy varieties which are now being tested for rooting and we hope eventually to offer many of the Dexter, Gable and other Hybrids on their own roots. If anyone is concerned about the development of plants on their own roots we can assure you that in every instance plants once rooted develop far more vigorously and more quickly than do the grafts.

All our stock is grown in DDT treated land and can therefore be shipped to any part of the United States without further treatment under the Japanese Beetle Quarantine.

ALBUM ELEGANS. X. H-1/.

## M A C H I N E   P L A N T I N G

ALTHOUGH MOST OF THE LARGE GROWERS IN THIS COUNTRY ARE ALREADY USING MACHINE PLANTING, SOME SMALLER NURSERYMEN ARE DOUBTFUL WHETHER IT COULD BE OF VALUE TO THEM. WE BELIEVE THAT IT COULD BECAUSE WHETHER THE BUSINESS IS LARGE OR SMALL RISING COSTS OF PRODUCTION MAKE IT NECESSARY FOR US TO MECHANIZE WHEREVER WE CAN. THE PICTURES ON THE OPPOSITE PAGE ILLUSTRATE SOME OF THE WORK WHICH WE DO WITH A MACHINE OBTAINED FOR US BY OUR LOCAL FORD AGENT. WITH THE VERY LOW GEAR AVAILABLE ON THE FORD TRACTOR ONE MAN ON EACH ROW CAN PLANT LINING OUT STOCK 4-6" APART AND DO AN EXCELLENT JOB.

### TOP LEFT----

SHOWS THE TWO ROW PLANTER PUTTING OUT TAXUS LINERS EARLY THIS SPRING. CUTTINGS HAD BEEN ROOTED 18 MONTHS IN COLD FRAMES AND WERE IDEAL MATERIAL FOR PLANTING IN THIS WAY.

### TOP RIGHT----

A CLOSE-UP SHOWING THE TWO PLANTING UNITS AND DETAILS OF SPACING. ROWS ARE 30" APART.

### BOTTOM LEFT----

THIS SAME MACHINE IS ADAPTABLE FOR PLANTING LARGER MATERIAL ON 3' ROWS AND THE ILLUSTRATION SHOWS GRAFTS OF BERCKMANS GOLDEN BIOTA GOING STRAIGHT OUT IN THE OPEN FIELD. LARGER STOCK CAN BE PLANTED BY CHANGING THE SHOES. THE WHEEL RUNNING BEHIND IS A SPACER AND CAN BE ADJUSTED TO RING THE BELL AT ANY DISTANCE FROM 8" TO 4 FEET.

### BOTTOM RIGHT----

IN CASE YOU MAY BE DOUBTFUL AS TO THE WAY PLANTS PUT IN BY MACHINE WILL DEVELOP THIS PICTURE SHOWS TWO YEAR OLD LINERS OF ARBORVITAE WHICH WERE PUT IN BY MACHINE AS ROOTED CUTTINGS DIRECT FROM THE GREENHOUSE. OUR EXPERIENCE IS THAT MACHINE PLANTING IS IN MOST INSTANCES BETTER THAN HAND PLANTING, ON ALL SIZES UP TO 2 FEET.

A TYPICAL THREE YEAR OLD  
PLANT OF RHODODENDRON  
ROSEUM ELEGANS ON ITS OWN  
ROOTS, AND A FLOWER TRUSS  
SHOWING THE COLOR AND TYPE  
OF BLOOMING. THIS IS IN OUR  
OPINION THE VERY BEST VARIETY  
FOR THE AVERAGE NURSERYMAN  
TO CARRY. SEE PAGE 31 FOR  
DETAILS.
